Tutorials IEEE ICC 2019

The rising complexity of 5G and beyond 5G networks is exceeding the modeling and
optimization possibilities of standard mathematical tools Nevertheless purely data driven
approaches require a huge amount of data to operate which might be difficult and or expensive
to acquire in practical large scale scenarios In this context the specific field of communication
theory presents a major

Intelligent Resource Management for 5G and Beyond IEEE

This special issue is devoted to the most recent developments and research outcomes
addressing the related theoretical and practical aspects on intelligent resource management for
5G and beyond and it also aims to provide worldwide researchers and practitioners an ideal
platform to innovate new solutions targeting at the corresponding key

Perspectives on 5G Applications and Services IEEE Future

5G is not just an evolutionary upgrade of the previous generation of cellular but it is a
revolutionary technology envisioned that will eliminate the bounds of access bandwidth
performance and latency limitations on connectivity worldwide 5G has the potential to enable
fundamentally new applications industries and business models and dramatically improve
quality of life around the world
